SUMMARY

As a third-year computer science student, I am skilled in .NET Core and SQL Server, focusing on building user-friendly web applications and efficient databases. I am eager to apply my academic knowledge to real-world projects and continuously learn new technologies to enhance user experiences.

EDUCATION

B.Sc. in Computer Science, Tanta University

2022 – 2026 | Tanta, Egypt

ACTIVITIES

Competitive Programming: Placed 45th in ECPC-2023 programming competition | Placed 5th in ECPC-2024 programming competition

Problem Solving: Solved +200 problems at LeetCode [↗](#) | Solved +800 problems at Codeforces [↗](#)

PROJECTS

E-Commerce Web API Project,

2024/12

ASP.NET RESTful Web API (Under Constructing) [↗](#)

- Designed and developed a scalable backend API for an e-commerce platform using ASP.NET Web API and Entity Framework Core.
- Implemented **Redis** for efficient cart caching and improved performance.
- Secured the platform with **JWT authentication**, **refresh tokens**, and **Google OAuth** integration.
- Integrated **SMTP** for reliable email verification and user notifications.
- Utilized the **Repository Pattern** with Unit of Work and Specification Design Pattern to ensure clean and maintainable architecture.
- Leveraged **Hangfire** for background job management, including order processing and email dispatching.
- Deployed the solution on **Microsoft SQL Server** for robust and scalable data management.
- Implemented **ASP.NET Core Identity** for user management and role-based access control.

Book Store (MVC), Book Store website [↗](#)

2024/08

- Developed a comprehensive online bookstore using ASP.NET Core 8 and the MVC pattern, incorporating N-Tier architecture for enhanced scalability and performance.
- Implemented secure authentication and authorization with ASP.NET Identity, and integrated Stripe for secure payment processing.
- Created a responsive, user-friendly interface utilizing HTML, CSS, JavaScript, and Bootstrap, featuring intuitive browsing, efficient book management, and seamless Microsoft and Google sign-ins.
- Technologies used: C#, EF Core, ASP.NET Core 8, MSSQL, ASP.NET Identity, HTML, CSS, Bootstrap, JavaScript, Stripe payment gateway.

Team management desktop app [!\[\]\(3dfb8d66e81160ad61421a3452093d1b_img.jpg\)](#)

- Developed a comprehensive Team Registration Management System using C# Windows Forms, SQL Server, and ADO.NET. This system enables users to sign up, log in, and choose from multiple project types authorized by their university.
- Project Selection: Integrated options for users to select from various university-approved projects upon successful login.

SKILLS

Programming languages: C#, C++

Framework and libraries: .NET Core, ASP.NET Core MVC, ASP.NET Web APIs, Entity Framework Core, LINQ, ASP.NET Core Identity, and Hangfire.

Databases: Microsoft SQL Server, In memory database(Redis)

General: Object-Oriented programming, Data Structures, Algorithms, N-tier architecture, clean architecture, Onion architecture, SOLID Principles, and Design Patterns.

Tools and technologies: Git, GitHub, and Postman.

Soft skills: Problem solving, team work, and time management.
