

Mohamed Khaled Rammah

Full Stack .NET Developer

📍 Asyut - Egypt ✉ rammohamed962@gmail.com ☎ +20 111 7137834 in mohamed khaled 🌐 ramah83

Education

- BS** **Assiut National University**, Computer Science and Artificial Intelligence Oct 2022 – July 2026
- GPA: 3.9/4.0 ([Academic Rrecord](#))
 - **Coursework:** Data structures and Algorithms, Object Oriented Programming, Design patterns, Operating system, AI (ML), computer networks, computer architecture

Activities

- **Competitive Programming:** Placed 1st in the ECPC-2023 Qualifications (university level), 83rd in ECPC-2023, and 76th in ECPC-2024 Qualifications .
- **Problem Solving:** Solved +120 problems at LeetCode | Solved +1100 problems at [Codeforces](#)
- **Events:** Attended several university conferences, including *Google Developer Groups On Campus – Assiut University*

Projects

Travelar Experts MVC App

[TravelExpertsMVC](#)

- Built a professional travel agency web application using ASP.NET Core MVC (.NET 8), enabling users to explore packages, register, log in, and manage bookings.
- Designed and implemented an admin dashboard for managing customers, bookings, and travel packages with role-based access control.
- Integrated password recovery, booking history tracking, and analytics dashboards for actionable customer insights.
- Tools & Stack: ASP.NET Core MVC, Razor, Bootstrap 5, jQuery, SQL Server, Entity Framework Core

E-Commerce Web API Project

[ECommerce Web API](#)

- Designed and implemented a scalable RESTful API for an e-commerce platform using ASP.NET Web API and Entity Framework Core.
- Secured the system with JWT authentication, refresh tokens, and Google OAuth; integrated SMTP for email verification and notifications.
- Improved performance with Redis caching, Hangfire for background job management, and applied Repository & Specification patterns for clean architecture.
- Tools & Stack: ASP.NET Web API, EF Core, SQL Server, Redis, Hangfire, ASP.NET Identity

SKILLS

Programming languages: C++, C, Java, C#, SQL, JavaScript, Python

Framework and libraries: NET Core, ASP.NET Core MVC, ASP.NET Web APIs, Entity Framework Core, LINQ, ASP.NET Core Identity, and Hangfire.

Databases: Microsoft SQL Server.

Technical Skills: Object-Oriented programming, Data Structures, Algorithms, clean architecture, SOLID Principles, and Design Patterns.

Development Tools: Git, GitHub.

Soft skills: Problem solving, team work, and time management.

Books

- **Grokking Algorithms:** ([Book Repo](#)) [🔗](#) Learned and practiced fundamental algorithmic concepts including: - Binary Search - Big-O Notation and Complexity Analysis - Recursion and Divide & Conquer - Sorting Algorithms (Selection Sort, Quicksort, Merge Sort) - Hash Tables - Breadth-First Search (BFS) & Depth-First Search (DFS) - Dijkstra's Algorithm (Shortest Path) - Greedy Algorithms - Dynamic Programming (e.g., Knapsack, Longest Common Subsequence) - K-Nearest Neighbors (Intro to ML perspective)
- **The Object-Oriented Thought Process:** Learned and practiced core OOP concepts including: - Classes and Objects - Abstraction - Encapsulation - Inheritance - Polymorphism - Interfaces and Abstract Classes - Composition vs. Inheritance - Object Relationships (Association, Aggregation, Composition) - Coupling and Cohesion - Design Principles and Best Practices
- **Head First Design Patterns:** Studied and applied key software design patterns including: - Strategy Pattern - Observer Pattern - Decorator Pattern - Factory Method & Abstract Factory Patterns - Singleton Pattern - Command Pattern - Adapter Pattern - Facade Pattern - Template Method Pattern - Iterator & Composite Patterns - State Pattern - Proxy Pattern - MVC (Model-View-Controller) Architecture Concepts

Courses

- **The Complete Data Structures and Algorithms Course in Python** – Dr. Mustafa Saad Covered arrays, linked lists, stacks, queues, recursion, binary search, sorting, merge sort, complexity analysis, and OOP.
- **Design Patterns** – University of Alberta via Coursera Studied reusable and scalable software design patterns.
- **Complete Web Development Course** – Hitesh Choudhary Comprehensive training on HTML, CSS, Tailwind CSS, Node.js, React, MongoDB, Prisma, and deployment techniques.
- **Supervised Machine Learning: Regression and Classification** – DeepLearning.AI via Coursera Studied regression and classification techniques for supervised machine learning.
- **Cloud and Virtualization Concepts** – MaharaTech – ITI/Mooc Explored cloud computing models (IaaS, PaaS, SaaS) and virtualization technologies (VMware, VirtualBox, Docker).
